- Developed and designed web applications to streamline interdepartmental data sharing, sales tracking, and project management, utilizing Angular 8, .NET Core, and SQL Server, React JS.
- Testing of modules, design test cases and provide a better solution.
- Provide a software development plan that meets the future needs of our clients and markets, based on the state of the art technologies.
- Working in different domains like Software, Application, Outsourcing, etc. Under it, I worked with clients like Ceasefire Industries Pvt Ltd.

2.   WROCUS TECHNOLOGIES PRIVATE LIMITED.   Noida, Uttar Pradesh

Full Stack Developer   July 2022- March 2024

Develop and maintain web based and client applications written in .net, C#, Angular, Windows Forms and JavaScript. Working in different domains like Software, Application, Outsourcing, etc. Under it, I worked with clients like Ceasefire Industries Pvt Ltd and Doceree.

Ceasefire Industries Pvt Ltd   Jan 2023-March 2023
(South East Delhi, Delhi)
Role: Full-Stack Developer

- At Ceasefire Industries Pvt Ltd, I'm responsible for building and maintaining a CRM (Customer Relationship Management) system.
- On the back end, I use .NET Core to create the server-side components of the CRM, ensuring it handles data efficiently and has functional APIs.
- Data is stored and managed using SQL Server for reliability and scalability as we manage more customer data.
- For the user interface, I work with Angular to design user-friendly and responsive CRM tools.
- My role involves collaborating with various teams to gather and address business needs, making sure our CRM system aligns with our company's goals.

Doceree   September 2022- December 2022
(New Delhi)
Role: MEAN Stack Developer

- At Doceree, I served as a MEAN Stack Developer, responsible for both back-end and front-end development.
- My primary focus was on managing the back end using Node.js and the front end using Angular. This project aimed to automate the collection, processing, and analysis of data related to healthcare professionals.
- The system featured a user-friendly interface, enabling users to
- Configure report guidelines based on brand-specific File Interface Agreements (FIAS).
- Data is stored and managed using Mongo DB for reliability and scalability as we manage more customer data.
- The technologies used in this project included Angular and Node.js, ensuring efficient and modern development practices. And manages all the activities related to hospitals.

PROJECTS

1. E-Commerce for Ceasefire

Title: Ceasefire Express
Description: Developed an ecommerce platform, Ceasefire Express, specializing in the sale of fire safety devices. Leveraged Angular for frontend development and .NET Core with SQL Server for backend, ensuring a secure and efficient shopping experience. Integrated payment gateways and inventory management systems for seamless transactions and inventory control.
Technologies:
Frontend: React JS, JavaScript, HTML, CSS, SCSS
Backend: .NET 6 Core, MVC, SQL Server
Integration: External services (WhatsApp, DHL, Payment etc.)
Deployment: Company-owned servers
Outcome:
Established a robust ecommerce platform catering specifically to fire safety device sales, facilitating convenient purchasing processes and ensuring customer safety.

2. Customer Relationship Manager for United Kingdom
Title: CCRM UK
Description: Developed a CRM web application tailored for United Kingdom employees, focusing on data security and compliance with UK regulations. The platform offers seamless authentication, role-based access control, and robust functionalities for customer relationship management, order processing, and analytics reporting. Designed to streamline operations, drive growth, and enhance customer satisfaction for UK organizations.
Technologies:
Frontend: Angular 8, Angular Material
Backend: .NET 4.6.1, SQL Server
Integration: External services (WhatsApp, SMS and Mail etc.)
Deployment: Company-owned servers
Outcome:
Enabled UK businesses to streamline operations, ensure compliance, and efficiently manage customer relationships. Resulted in accelerated growth and heightened customer satisfaction.

3. CRM Platform Development for International Business
Title: Global CRM
Description: Designed and developed a comprehensive Customer Relationship Manager (CRM) platform to meet global client needs. Implemented robust authentication protocols ensuring data security. Features include customer profile management, order processing streamlining, and analytics report generation. Incorporated inquiry management system for efficient customer query handling. Resulted in enhanced customer satisfaction, streamlined operations, and improved decision-making for businesses worldwide.
Technologies:
Frontend: Angular 13
Backend: .NET 5.0, SQL Server
Integration: External services (WhatsApp, SMS and Mail etc.)
Deployment: Company-owned servers
Outcome:
Revolutionized CRM, enhancing operations and productivity. Improved customer satisfaction, streamlined orders, and informed decision-making. Scalable for businesses of all sizes, enabling success in global markets.
